

Visual Product Matcher

Project Overview

The **Visual Product Matcher** is a web application that allows users to upload an image and instantly find visually similar products from a dataset. This helps in quick product discovery, especially in e-commerce platforms. The system uses **deep learning and image similarity techniques** to provide accurate matches.

-

How It Works

1. Upload an image of a product.
 2. The system extracts **visual features** using a deep learning model.
 3. Finds and displays the **most similar products** from the dataset.
-

Key Features

- Image upload & preview
 - Product similarity detection
 - Real-time results
 - Responsive and user-friendly design
-
